SERIES 31 LATERAL-TRANSFER FLAT TOP

SPROCKETS

EUROBELT[®] SERIES 31 LATERAL-TRANSFER

- Lateral transfers with containers of all types and sizes.
- Bevelled edge to reduce the distance between the belts that take part in the transference.
- It eliminates the use of dead plates, finger plates, and other parts of transference.
- Lower little legs that keep the belt aligned, countering the lateral forces.

EUROBELT[®] offers all sprockets in polypropylene and polyacetal.

For applications in which it is required, made-to-measure sprockets are available in stainless steel with any number of teeth.

N.º of teeth T	Pitch Diameter	Bore ∅	Hub Width
6	60	25	24
11	106.5	40	40
16	153.5	40/60	40
20	191.5	40/60/90	40
